

## Static Compression Strength Curve

for 1.5 pcf (24 g/l) Foam Molded from ARPAK® Expanded Polyethylene (EPE) Beads

Note: 24 g/l = 1.5 pcf = 37X (g/l = grams per liter; pcf = pounds per cubic foot; X = foam expansion ratio)  
1 MPa = 1 N/mm<sup>2</sup> = 145.04 psi (Units of pressure/stress)  
Test Speed at 12.5 mm/minute (per ASTM-D3575)
